

CONTENTS TO VOLUME 130

Hypothesis

- Comments on the evolution of 23–28 S rRNA: Mature 23 S rRNA of prokaryotes appears homologous with the precursor of 25–28 S rRNA of eukaryotes,
R. A. Cox, J. M. Kelly 1

Research Letters

- The specific interaction of guanine with carboxylate ions in water, *G. Lancelot, R. Mayer* 7
- Spin trapping artifacts due to the reduction of nitroso spin traps, *C. Mottley, B. Kalyanaraman, R. P. Mason* 12
- N-Terminal sequence homology among retinoid-binding proteins from bovine retina, *J. W. Crabb, J. C. Saari* 15
- The use of diethylpyrocarbonate for sequencing adenines and guanines in DNA, *A. S. Krayev* 19
- Photo-modification studies of the contacts of the 5'-terminus of growing RNA with the subunits of RNA-polymerase, *M. A. Grachev, E. F. Zaychikov* 23
- Lipid composition of chlorophyll–protein complexes: Specific enrichment in *trans*-hexadecenoic acid of an oligomeric form of light-harvesting chlorophyll *a/b* protein, *A. Trémolières, J.-P. Dubacq, F. Ambard-Bretteville, R. Rémy* 27
- Detection and sequence of an internal A-rich T₁ oligonucleotide series in brome mosaic viral RNA3, *E. R. Fowlks, Y. F. Lee* 32
- A rapid preparation of the apo–holo hybrid of aspartate aminotransferase, *D. Vergé, M. Arrio-Dupont* 39
- The dependence of the linking number of a circular minichromosome upon the shape and the orientation of its nucleosomes, *S. A. Grigoryev, L. B. Ioffe* 43
- Disulfide bonds protect the encapsidated chromosomes of Simian virus 40, *S.-C. Ng, M. Bina* 47
- Siderophore iron transport followed by Mössbauer spectroscopy, *B. Matzanke, G. Winkelmann* 50
- Localization of the elongation factor G on *Escherichia coli* ribosome, *A. S. Girshovich, T. V. Kurtskhalia, Yu. A. Ovchinnikov, V. D. Vasiliev*
- Phosphorylated proteins in the passage from free mRNP to polysomes in mice plasmacytoma cells, *R. Elkaim, J. Kempf, J. M. Egly* 60
- Increase of ornithine transcarbamylase protein in sparse-fur mice with ornithine transcarbamylase deficiency, *P. Briand, L. Cathelineau, P. Kamoun, D. Gigot, M. Penninckx* 65
- Characterization of three proteins stimulating RNA polymerase II, *Y. Nakanishi, Y. Mitsuhashi, K. Sekimizu, H. Yokoi, Y. Tanaka, M. Horikoshi, S. Natori* 69
- Photophosphorylation of ribose modified ADP analogs by spinach chloroplasts, *K. S. Boos, B. Dimke, E. Schlimme, H. Wiedner, K. Edelmann, H. Strotmann* 73
- Induction of peroxisomes and mitochondria by di(2-ethylhexyl)-phthalate, *A. E. Ganning, G. Dallner* 77
- Appearance of asialo GM1 glycosphingolipid on cell surface during lymphokine-induced differentiation of M1 cells, *K. S. Akagawa, T. Momoi, Y. Nagai, T. Tokunaga* 80
- Synthesis of an unnatural P–N bond catalyzed with *Escherichia coli* ribosomes, *N. B. Tarusova, G. M. Jacovleva, L. S. Victorova, M. K. Kukhanova, R. M. Khomutov* 85

Thioredoxin and ferredoxin—thioredoxin reductase activity occur in a fermentative bacterium, <i>K. E. Hammel, B. B. Buchanan</i>	88
An optical and ESR investigation on the acceptor side of the reaction center of the green photosynthetic bacterium <i>Prosthecochloris aestuarii</i> , <i>T. Swarthoff, P. Gast, A. J. Hoff, J. Ames</i>	93
Amine-induced inhibition of photosynthetic oxygen evolution: A correlation between the microwave power saturation properties of signal II and photo-system II-associated manganese, <i>Ch. F. Yocum, G. T. Babcock</i>	99
Isolation of a DCCD-binding protein from bovine chromaffin granule membranes, <i>R. Sutton, D. K. Apps</i>	103
Identification and biological activity of novel ω -oxidized metabolites of leukotriene B ₄ from human leukocytes, <i>G. Hansson, J. A. Lindgren, S.-E. Dahlen, P. Hedqvist, B. Samuelsson</i>	107
Preparation of adrenocortical cell suspension highly responsive to ACTH or dibutyrylcyclic AMP. Effects of albumin, Ca ²⁺ or stress, <i>W. H. Trzeciak, D. Mathé</i>	
Partial proteolysis of the natural ATPase inhibitor from beef heart mitochondria. Isolation and characterization of an active cleavage product, <i>A.-C. Dianoux, P. V. Vignais, A. Tsugita</i>	119
The pentose phosphate pathway: Evidence for the indispensable role of glucose-phosphate isomerase, <i>M. J. Morgan</i>	124
Substrate-mediated channeling of a chemical reagent to the active site of cAMP-dependent protein kinase, <i>J. S. Jimenez, A. Kupfer, Ph. Gottlieb, S. Shaltiel</i>	127
Incorporation of methionine-derived methyl groups into factor F ₄₃₀ by <i>Methanobacterium thermoautotrophicum</i> , <i>R. Jaenchen, G. Diekert, R. K. Thauer</i>	133
Is the mitochondrial dicyclohexylcarbodiimide-reactive protein of M _r 33 000 identical with the phosphate transport protein?, <i>J. Houštěk, S. Pavelka, J. Kopecký, Z. Drahota, F. Palmieri</i>	137
Stimulation of enzyme activities by fragments of calmodulin, <i>J. Kuznicki, Z. Grabarek, H. Brzeska, W. Drabikowski, P. Cohen</i>	141
Leukotriene B ₄ —A stereospecific stimulator for release of lysosomal enzymes from neutrophils, <i>I. Hafström, J. Palmblad, C. L. Malmsten, O. Rådmarm, B. Samuelsson</i>	146
<i>Datura stramonium</i> lectin: Isolation and characterization of the homogeneous lectin, <i>J. F. Crowley, I. J. Goldstein</i>	149
Inhibition of in vitro translation by antibodies directed against N ⁶ -methyladenosine, <i>R. Dante, A. Niveleau</i>	153
Book Reviews and Booklist No. 31	159
Notes to Authors	172

Hypothesis

A generalised model for the equilibration of quinone pools with their biological donors and acceptors in membrane-bound electron transfer chains, <i>P. R. Rich</i>	173
---	-----

Research Letters

Existence of a novel prosthetic group, PQQ, in membrane-bound, electron transport chain-linked, primary dehydrogenases of oxidative bacteria, <i>M. Ameyama, K. Matsushita, Y. Ohno, E. Shinagawa, O. Adachi</i>	179
The cardiotoxic antibiotic doxorubicin inhibits the Na ⁺ /Ca ²⁺ exchange of dog heart sarcolemmal vesicles, <i>P. Caroni, F. Villano, E. Carafoli</i>	184
The identification of Lys ₁₂₆ as the retinal binding residue in bacteriorhodopsin, <i>E. Mullen, A. H. Johnson, M. Akhtar</i>	187
Metal chelate affinity chromatography of the <i>Dolichos biflorus</i> seed lectin and its subunits, <i>C. A. K. Borrebaeck, B. Lönnnerdal, M. E. Etzler</i>	194
Detection of a novel mammalian protein phosphatase with activity for phosphotyrosine, <i>J. G. Foulkes, R. F. Howard, A. Ziemiecki</i>	197

The glycoprotein nature of Forssman antigen in dog gastric mucosa, <i>B. L. Slomiany, Z. Banas-Gruszka, K. Kojima, A. Herp, A. Slomiany</i>	201
Isolation and partial characterization of an extracellular protease from <i>Sporotrichum dimorphosporum</i> , <i>G. Tapia, E. Curotto, S. O'Reilly, G. Zalez</i>	205
Sequence-specific priming of the in vitro synthesis of DNA complementary to citrus exocortis viroid, <i>W. Rohde, M. Schnölzer, H. L. Sängler</i>	208
Antibody against octopine dehydrogenase from crown gall tumor tissue, a tool in studies of plant cell transformation, <i>A. Goldmann, Th. Moureaux, P. Rouze</i>	213
Physical characteristics of 23 S rRNA from the 50 S ribosomal subunit of <i>Escherichia coli</i> , <i>M. F. Tam, J. A. Dodd, W. E. Hill</i>	217
The effect upon aminoacylation of bisulphite addition to 2-methylthio- <i>N</i> ⁶ -isopentenyl adenosine of <i>Escherichia coli</i> phenylalanine tRNA, <i>J. P. Goddard, M. Lowdon</i>	221
Specificity in the interaction of hnRNA and mRNA with proteins as revealed by in vivo cross-linking, <i>C. A. van Eekelen, T. Riemen, W. J. van Venrooij</i>	223
Separation of mRNA coding for α - and β -tropomyosin, <i>A. R. MacLeod</i>	227
Subcellular distribution of cyclic AMP-dependent protein kinase activity and of cyclic AMP-binding in human platelets: Modification by Ca ²⁺ -dependent proteolysis, <i>S. E. Salama, R. J. Haslam</i>	230
Epinephrine inhibits adenylate cyclase and stimulates a GTPase in human platelet membranes via α -adrenoreceptors, <i>K. Aktories, K. H. Jakobs</i>	235
Characteristics of renal glutathione oxidase activity, <i>K. Ormstad, T. Låstbom, S. Orrenius</i>	239
Photoaffinity labeling and identification of (a component of) the small-intestinal Na ⁺ , D-glucose transporter using 4-azidophlorizin, <i>M. Hosang, E. M. Gibbs, D. F. Diedrich, G. Semenza</i>	244
The inhibition of <i>Dictyostelium discoideum</i> alkaline phosphatase by a low molecular mass factor and its implication of the developmental regulations of the enzyme, <i>D. V. Mohan Das, G. Weeks</i>	249
Lipid-linked intermediates in the biosynthesis of xanthan gum, <i>L. Ielpi, R. Couso, M. Dankert</i>	253
Physicochemical studies on delta haemolysin, a staphylococcal cytolytic polypeptide, <i>J. E. Fitton</i>	257
Hydrolysis of phospholipids by phospholipase C in intact cells of wild-type and envelope mutants of <i>Escherichia coli</i> K12, <i>Z. Starkova, N. Bonnaveiro, J. Starka</i>	261
Evidence for internal mobility in alfalfa mosaic virus, <i>P. J. Andree, J. H. Kan, J. E. Mellema</i>	265
Cloning of a defective polyoma DNA molecule with rearrangements in the region coding for middle and large T antigen, <i>C. Parent, M. Bastin</i>	269
Conditions affecting DNA cleavage by <i>Tth</i> I at a <i>Tth</i> I endonuclease- <i>dam</i> methylase overlapping sequence, <i>A. Venegas, M. Motles, C. Vasquez, R. Vićuna</i>	272
A single DNA-binding protein from <i>pseudomonas aeruginosa</i> homologous to proteins NS1 and NS2 (HU proteins) of <i>Escherichia coli</i> and other bacteria, <i>A. R. Hawkins, J. C. Wooton</i>	275
Study of the secondary and tertiary structure of ribosomal protein S7 from <i>Escherichia coli</i> in solution, <i>Z. V. Gogía, S. Y. Venyaminov, V. N. Bushuev, A. S. Spirin</i>	279
³¹ P NMR studies of the interaction of ATP with RNA polymerase from <i>Escherichia coli</i> , <i>I. A. Slepneva, L. M. Weiner</i>	283
The sequence of mitochondrial arginine tRNA (anticodon UCG) from a transplantable rat tumor, Morris hepatoma 5123D, <i>H. P. Agrawal, R. C. Gupta, K. Randerath, E. Randerath</i>	287
Activation of human and mouse 2-5A synthetase and mouse protein P _i kinase by nucleic acids: Structure-activity relationships and correlations with inhibition of protein synthesis and interferon induction <i>P. F. Torrence, M. I. Johnston, D. A. Epstein, H. Jacobsen, R. Friedman</i>	291
Rat α_1 -antitrypsin: Preliminary characterization of the in vitro mRNA translation product, <i>J. Carlson, J. Stenflo</i>	297

Guanine nucleotides regulate specifically agonist-binding affinity of the α_2 -adrenergic receptor in white adipocytes, <i>Y. Guidicelli, R. Pecquery</i>	301
Plasma apolipoprotein A-1 levels after thoracic duct drainage in the rat, <i>B. Johansson, Å. Nilsson</i>	305
Inactivation of liver phosphofructokinase by phosphatase or by low pH is inhibited by fructose 2,6-bisphosphate, <i>H. D. Söling, J. Kuduz, I. A. Brand</i>	309
A comparison of the copper sites in arthropod and mollusc oxyhemocyanins, <i>R. Torensma, J. C. Phillips</i>	314
Corrigendum	317
